---

## PROJECTS

### Ordaz Solutions Portfolio Website:

- Developed a static website using React (Vite), Tailwind CSS, and Node.js. Deployed on Amazon S3 with a CloudFront distribution for performance and security. Configured a custom domain via Route53 with an SSL certificate from AWS Certificate Manager. Implemented CI/CD automation using GitHub Actions for updates.

### Serverless Microservices with AWS SAM for Pet Website:

- Built a React frontend with images stored on Amazon S3. Developed a serverless backend using API Gateway, AWS Lambda, and Amazon DynamoDB. Automated reporting workflows with AWS Step Functions, Lambda and SNS. Monitored application performance using Amazon CloudWatch Logs. Automated deployments using AWS SAM CLI.

## TECHNICAL SKILLS

**DevOps:** CI/CD pipelines, Infrastructure as Code, CloudFormation, CodePipeline, CodeBuild

**Frameworks:** React, Vite with React, Django

**Serverless:** Lambda, DynamoDB, API Gateway, SAM

**Monitoring & Automation:** CloudWatch, CloudTrail, Amazon SQS, Amazon SNS, Amazon Bedrock

**Programming, Scripting, and Version Control:** Python, YAML, JSON, HTML, CSS, JavaScript, GitHub

---
